Group Insurance Plans A Valuable Membership Service

1. **GROUP TERM LIFE**
—up to $100,000 low-cost life coverage
2. **HOSPITAL MEDICAL PAYER**
—the supplemental In-Hospital Plan
3. **SALARY-PAYER**
—sends you a "substitute" paycheck when you are disabled.
4. **CANCER PROTECTION**
—extra help when you need it most
5. **ACCIDENTAL DEATH AND DISMEMBERMENT**
—benefits doubled because you are an educator

Information Sources continued

Materials Engineering has presented an excellent article, "Materials Information Sources," that provides educators with useful insights on the current trends that are being instituted or introduced throughout the nation.

This information should help industrial people do a better job in materials selection. It indicates what government agents, private firms, and associations are doing to cope with the materials selection problem. It also presents several materials selection examples that industrial educators could draw from in developing this phase of their respective programs.

In addition, the author has presented a wide array of references that can be used by educators for developing a materials selection program that is particularly suited to their teaching area. (*Materials Engineering*, November 1975)

Louie Melo

Indirect Leadership
(from page 237)

Conclusion

Behind every successful student organization is a hard-working advisor who guides the group unobtrusively. He/she feels pride and accomplishment each time the organization's members receive deserved recognition. The advisor's activity and influence may not be overt, but the training, organization, and guidance are his/her accomplishment, and the students benefit from the experience throughout their careers and participation in civic affairs. □
